

they can get through this economically; so that, one, they can more afford life; but, secondly, so that we can maintain political will as we stand up against the Russians.

There are other aspects of this, as well. For those interested in battery technology, most of the critical minerals are coming from Russian or Chinese sources. If we are concerned about climate and we are concerned about the ability to be critical mineral independent in case of geopolitical tension, this is the exact same issue that we have been speaking about.

How do we proceed? One, we just have to recognize that we are at a time of extreme geopolitical tension where decisions we make in this country have ramifications worldwide. The Europeans are looking to us to help them with their energy crisis, and if we fail to help the Europeans with their energy crisis, the Europeans will pay as much as 6,000 euros more a year per family for their energy, and they will probably go into a deep recession.

On the other hand, if we are able to solve this for the Europeans, we will also solve it for our families, the ones who are paying \$4 to \$6 for a gallon of gasoline.

We know what we are speaking about. Just to show that this can be done, as the United States has substituted natural gas for coal, we have lowered our domestic emissions by 14 percent at a time when global emissions have risen 4 percent. In that time, since 2005, where we lowered our emissions by 14 percent, our economy is larger. We have millions more people and we are domestically producing much more oil and gas, and there has been a subsequent return of energy-related industry to the United States.

So despite an industrial profile and a mining profile and a population profile that would suggest that there would be greater emissions, we actually have 14 percent less than 2005. We did it by acknowledging that domestic production of energy was going to help with our economy, help with the economy of families, but also help our domestic security, and would also help climate and the carbon intensity of our society.

We have done this for our country. Now the question is, Can we do it for the world? I would argue that if we choose not to, the Russians will win. There is no way that Europe or Europeans are going to accept energy poverty with a crater economy due to the lack of affordable energy.

On the other hand, if we are able to make this commitment doing things such as financing for solar panels in North Africa, an Operation Warp Speed for energy to bring our energy resources to bear, the continued substitution of lower carbon intensity energy sources for that which currently is higher carbon intensity, then, we can accomplish worldwide that which we have accomplished here in the United States, which is to lower greenhouse gas emissions while making a more

prosperous society and increasing domestic and international security.

This is not theoretical. I have spoken with someone who could have an offshore LNG export facility completed in 12 months, if he had his permits from the Federal Government. I spoke to someone involved with drilling in the Outer Continental Shelf and learned that their company could be sending oil to the refineries in Louisiana within 12 months if they could get their permits done expeditiously. And I can give list after list of renewable, of fossil, and otherwise.

It is now the time for the United States to take leadership. If we don't, our families will continue to suffer at the pump, Europeans will enter a recession, and, most unfortunately, the cause of freedom worldwide will be harmed by Russia's continued economic hegemony over the rest of the world because of their energy.

I yield the floor.

The PRESIDING OFFICER. The Senator from Michigan.

Mr. PETERS. I ask unanimous consent to be recognized for 3 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

NOMINATION OF SHALANDA D. YOUNG

Mr. PETERS. Mr. President, I rise in support of Shalanda Young's nomination to be the Director of the Office of Management and Budget.

Ms. Young has served with distinction as OMB's Acting Director for the past year, leading the administration's efforts to execute the American Rescue Plan, the bipartisan infrastructure bill, and numerous Federal cybersecurity priorities.

Over the past year, she has been a true partner to Congress, working closely with Members on both sides of the aisle to find bipartisan paths forward.

In addition to her proven leadership at OMB this past year, Ms. Young brings nearly two decades of public service experience to her role, including as a senior staff Member on the House Appropriations Committee where she led challenging bipartisan negotiations around the debt limit, government funding, and budget reform.

OMB will continue to be central to the administration's efforts to tackle the Nation's ongoing challenges, and Ms. Young will be instrumental in leading that work.

I have every confidence in Ms. Young's ability to continue to rise to the challenges facing OMB, both now and in the future.

I urge my colleagues to join me in supporting the confirmation of Shalanda Young as director of the Office of Management and Budget.

CLOTURE MOTION

The PRESIDING OFFICER. Pursuant to rule XXII, the Chair lays before the Senate the pending cloture motion, which the clerk will state.

The legislative clerk read as follows:

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of rule XXII of the Standing Rules of the Senate, do hereby move to bring to a close debate on the nomination of Executive Calendar No. 726, Shalanda D. Young, of Louisiana, to be Director of the Office of Management and Budget.

Charles E. Schumer, Alex Padilla, Christopher Murphy, Edward J. Markey, Gary C. Peters, Brian Schatz, Jack Reed, Tammy Duckworth, John W. Hickenlooper, Sheldon Whitehouse, Tim Kaine, Richard Blumenthal, Christopher A. Coons, Margaret Wood Hassan, Patrick J. Leahy, Debbie Stabenow.

The PRESIDING OFFICER. By unanimous consent, the mandatory quorum call has been waived.

The question is, Is it the sense of the Senate that debate on the nomination of Shalanda D. Young, of Louisiana, to be Director of the Office of Management and Budget, shall be brought to a close?

The yeas and nays are mandatory under the rule.

The clerk will call the roll.

The legislative clerk called the roll.

Mr. DURBIN. I announce that the Senator from Connecticut (Mr. BLUMENTHAL), the Senator from Nevada (Ms. CORTEZ MASTO), the Senator from Illinois (Ms. DUCKWORTH), the Senator from California (Mrs. FEINSTEIN), the Senator from Minnesota (Ms. KLOBUCHAR), the Senator from Georgia (Mr. OSSOFF), the Senator from Hawaii (Mr. SCHATZ), and the Senator from New Hampshire (Mrs. SHAHEEN) are necessarily absent.

Mr. THUNE. The following Senators are necessarily absent: the Senator from North Carolina (Mr. BURR), the Senator from Tennessee (Mr. HAGERTY), the Senator from Louisiana (Mr. KENNEDY), the Senator from Kansas (Mr. MORAN), the Senator from Ohio (Mr. PORTMAN), the Senator from Utah (Mr. ROMNEY), the Senator from Pennsylvania (Mr. TOOMEY), and the Senator from Mississippi (Mr. WICKER).

The yeas and nays resulted—yeas 53, nays 31, as follows:

[Rollcall Vote No. 79 Ex.]

YEAS—53

Baldwin	Heinrich	Peters
Bennet	Hickenlooper	Reed
Blunt	Hirono	Rosen
Booker	Hoeven	Sanders
Brown	Hyde-Smith	Schumer
Cantwell	Kaine	Shelby
Cardin	Kelly	Sinema
Carper	King	Smith
Casey	Leahy	Stabenow
Cassidy	Lujan	Sullivan
